

Claiming your CME/Completion Certificate after your ATOM Course

To claim your CME Certificate or Certificate of Completion for an ATOM Course, the following conditions must be met:

- Student must complete all online work
 - Pretest
 - Pre-course Surgical Self Efficacy Evaluation
 - Post test (Score 75% or above)
 - Post-course Surgical Self Efficacy Evaluation
 - Course Evaluation
- Student must fully attend live course

Advanced Trauma Operative Management (ATOM) 3rd Ed

Overview Faculty Accreditation **Take course**

The Advanced Trauma Operative Management (ATOM) course uses simulation in an operative laboratory to teach proper operative techniques for penetrating injuries to the chest and abdomen. The course was established in 1998 and is intended for senior surgical residents, trauma fellows, military surgeons, and general surgeons not frequently called on to treat penetrating injuries. Its goals are to improve knowledge, self-confidence, and technical competence for managing these surgical repairs. During the program, students are asked to identify traumatic injuries, develop a plan to surgically repair them, and then execute the plan using proper operative technique.

The course follows a 1-day, standardized schedule with the didactic lectures/discussions preceding the laboratory experience, where the instructor evaluates the operative skill of the participant in the laboratory. The pre- and post test, pre-course and post course self-efficacy evaluation, course evaluation, and CME claiming are all completed online using the American College of Surgeons' (ACS) Learning Management System (LMS).
